<b>IN PROGRESS</b>			
General UI fixes		ALL	
Decrease Frequency of Deleting Data Older than 5 Days		GUIANG	
Revise SALN Form Backend		GUIANG	<ul style="list-style-type: none"> <li>Derived Information (e.g. age of child) should not be inputted</li> <li>validate that the kids, assets/liabilities are distinct</li> </ul>
Revise Table CSS for Responsiveness		PEÑAFLOIDA	<ul style="list-style-type: none"> <li>Rename Submit to Save</li> <li>Derived Information (e.g. age of child) should not be inputted</li> </ul>
Remove scrollbars from registration/login pages		AGCAOILI	

**Note: server-side OTP hashing was listed as a task, but it was realized by the developers that it's not really required**

## Risks

In revising the inputs for the SALN form, we should be careful to update both the server and client so that no formatting conflicts occur.
