29 August 2025

Dear Dr. Figueroa,

   I/We understand that this project is owned by the University of the Philippines because it is created as part of the academic requirements for CS 191 & 192 (Software Engineering). I/We recognise that there is no warranty for this free software and the students will provide support and maintenance services for the project until May 22, 2026 only.

   I/We understand that the students will get a grade of INC if they are not able to comply with the agreed system (as documented on the 2nd client meeting) unless I/we agree that the project is sufficient (and in case it is insufficient, the reason for non-fulfilment is on my/our part).

   I/We are aware that the course requires the project documents to be posted in a **publicly accessible** URL: https://shirokamiqq.github.io/cs191-LAMig-GroupBlog/

Signed,
